

ERFOLGSGESCHICHTEN

Erfolgsgeschichten sind beispielhafte Berichte über erfolgreiche Unterstützungen unserer Kunden im Enterprise Europe Network. Sie zeigen, wie Kooperationsanbahnungen zwischen Unternehmen vermittelt, Partner für Forschungsprojekte zusammengebracht, durch eine gezielte Beratung das passende Förderprogramm gefunden oder unsere Kunden bei der Erschließung neuer Märkte durch das Enterprise Europe Network beraten wurden.

GUIDING SPANISH ROBOTIC TECHNOLOGY TOWARDS GLOBAL MARKETS

Guiding Spanish robotic technology towards global markets

A Spanish SME has successfully reoriented its business after recognising the potential for growth in the mobile robotics sector. The Enterprise Europe Network was instrumental in helping the business to find new collaborators and develop a global mindset.

BREAKING DOWN BARRIERS WITH ON-SCREEN SIGN LANGUAGE AVATAR

Breaking down barriers with on-screen sign language avatar

The proliferation of sign language has enabled more deaf people to enjoy visual content than ever before. With Enterprise Europe Network's support, an Austrian SME has taken this one step further by developing an on-screen avatar that can turn information into sign language using smart algorithms.

ENERGY EFFICIENT COOKWARE COULD REPEL BACTERIA AND WATER

Energy efficient cookware could repel bacteria and water

For small businesses with big ideas, raising the capital needed for research and development investment is the first and often the biggest challenge. With support from the Enterprise Europe Network, an Italian SME sought to make its cookware products, anti-bacterial, greener and more efficient using nanotechnology and specialised coatings.

ESTONIAN SME GROWS INTO GREEN HOUSING MARKET

Estonian SME grows into green housing market

Households account for almost 20% of the EU's greenhouse gas emissions. Political efforts to offset this environmental burden are driving demand for more energy efficient buildings. The Enterprise Europe Network helped an Estonian manufacturer of green buildings take advantage of this opportunity by expanding into Sweden, where they have laid the foundations for more sustainable housing. With two contracts in Sweden, together worth EUR 2.5 million, Timbeco is now looking to expand even further.

HELPING BOOST EUROPE'S ORGANIC GRAIN MARKET

Helping boost Europe's organic grain market

Over 11 million hectares of land in Europe are dedicated to organic farming and demand for organic products continues to increase. For Polish SME BHZ Agromat, this presented a real opportunity to scale up their organic grain business and start trading across Europe. Agromat became one of Poland's biggest organic grain traders thanks to the Enterprise Europe Network's support.

FINNISH WIND POWER SETS SAIL FOR NEW MARKETS

Finnish wind power sets sail for new markets

Maritime transport emits around 1 billion tonnes of CO2 each year, which represents around 2.5 % of global greenhouse gas emissions. With the help of the Enterprise Europe Network, a Finnish SME was able to enhance its clean energy solution and help big freighters become greener and more efficient.

NEW BLOOD TEST BRINGS TAILOR-MADE CANCER TREATMENT A STEP CLOSER

New blood test brings tailor-made cancer treatment a step closer

As life expectancy increases around the world, personalised medicine has become a new hope in the fight against cancer. Thanks to the Enterprise Europe Network, Life Length, an SME based in Spain, is validating a new diagnostic test that can help doctors tailor more effective treatment for individual cancer patients.

FAST CHARGING ELECTRIC BUS PAVES WAY FOR CLEANER PUBLIC TRANSPORT

Fast charging electric bus paves way for cleaner public transport

Electric vehicles will play a key role in driving the decarbonisation of our cities, but the business case for ditching fossil fuel buses has so far been lacking. Heliox, a Dutch SME, has developed a super-fast charging system for electric buses and is now taking their sustainable solution global, thanks to support from the Enterprise Europe Network.

SCOTTISH SME BEATS BIG MULTINATIONALS TO TIDAL ENERGY MARKET

Scottish SME beats big multinationals to tidal energy market

Harvesting the energy of our tides could be the next big source of clean, cheap and reliable electricity, but the sector is still in its infancy. Thanks to local support from the Enterprise Europe Network, Scotland's Nova Innovation Ltd was able to connect its tidal technology to the grid well before the big multinational energy companies.
